

WordService

Thank you for using our freeware. This service provides a number of functions to convert or format the currently selected text, insert data or show statistics of the selection within all Cocoa applications, e.g. TextEdit, Mail, Stickies, [DEVONthink](http://www.devontechnologies.com), supporting services.

System requirements

Mac with Intel processor, OS X 10.6.8 or later.

Installing and updating

Simply move WordService into your *Applications* or *Applications/Utilities* folder or into the folder *Services* (in the Finder visit the *Go* menu with the *Option* key pressed; choose *Library*; locate a folder named *Services*; if there is none, you can safely create it manually). Double-clicking service let's OS X learn about its new abilities; alternatively log out and in again.

In addition you may need to switch on the new *Services* menu options. Open *System Preferences*, then navigate to *Keyboard > Keyboard Shortcuts > Services > Text*. Turn on all options you want and optionally add a keyboard shortcut.

Using the WordService services

Select a text and choose the desired menu item in the *Services* menu (or press the appropriate shortcut if available). To remove unnecessary entries from your *Services* menu, use the *Services Preferences* option from the *Services* menu.

Note: The default tabulator width is set to 4. If you want to change this value, modify the file 'org.grunenberg.wordservice.plist' in your *Preferences* folder using PropertyListEditor, PrefEdit,

or any text editor, e.g. TextEdit. Alternatively use the following command in Terminal (replace “8” with the desired width): `defaults write org.grunenberg.wordservice TabulatorWidth 8`

Functions

Insert

- | | |
|---------------------|--|
| • Contents Of Path | Insert files and folders of the selected path (tilde is expanded) and of all its subdirectories (e.g. select the path ‘~/’ and this function will insert all contents of your home directory). |
| • Short Date | Insert the current date in short form. |
| • Long Date | Insert the current date in long form. |
| • Short Date & Time | Insert the current date and time in short form. |
| • Long Date & Time | Insert the current date and time in long form. |
| • Time | Insert the current time. |

The date and time commands don’t need selected text. They use the default system language and date and time formats.

Convert

- | | |
|--------------------------------|---|
| • Initial Caps Of Sentences | Makes the first letter of every sentence uppercase. |
| • Initial Caps Of Words | Makes the first letter of every word uppercase. |
| • Lowercase | Makes all letters lowercase. |
| • All Caps | Makes all letters uppercase. |
| • Decode Tabs | Convert tabs to spaces. |
| • Encode Tab | Convert spaces back to tabs. |
| • Macintosh Line Endings (CR) | Convert line breaks according to Mac conventions. |
| • Unix Line Endings (LF) | Convert line breaks for UNIX and OS X. |
| • Windows Line Endings (CR+LF) | Convert line breaks for Windows. |
| • Smart Quotes | Convert straight quotes to curly quotes. |
| • Straight Quotes | Convert curly quotes to straight quotes. |
| • Rotate13 | Garble and un-garble text using a very simple method. |
| • Windows- to Mac-Encoding | Convert from Windows to Mac encoding. |
| • Mac- to Windows-Encoding | Convert from Mac to Windows encoding. |

Format

- Reformat A combination of *Trim Lines*, *Remove Line Endings*, *Remove Multiple Spaces* and *Remove Quotes* preserving paragraphs.
- Remove Attachments Removes attachments from rich text.
- Remove Line Endings Removes line endings.
- Remove Links Removes links from rich text.
- Remove Multiple Feeds Removes multiple line feeds.
- Remove Multiple Spaces Replaces multiple spaces with a single space.
- Remove Quotes Removes <quotes>.
- Shift Right Indents text using tabs.
- Shift Left Outdents text using tabs.
- Sort Lines Ascending Sorts lines alphabetically.
- Sort Lines Descending Sorts lines alphabetically, descending.
- Trim Line Beginnings Trims all white space from the beginning of lines.
- Trim Line Endings Trims all white space from the end of lines.
- Trim Lines Trims white space from beginning and end of lines.

Statistics

Count characters, spaces, words, and lines. As this function does not modify the selected text, it is possible to use this also for read-only text like received email messages or HTML pages.

Known bugs and limitations

Do not use another WordService command while a results panel is displayed.

Version history

- | | | |
|-------|----------|---|
| 2.8.1 | NEW | Can be double-clicked and installed like an application. |
| | NEW | Spanish localization by Ramón Navajas. |
| | Improved | Sorting of lines uses localized sorting rules. |
